

OCHRE SUN

MEET OUR RANGE

Ochre Sun high protection SPF50+ formula is infused with Indigenous botanicals that heal, protect, and nurture your skin.

Ochre Sun is the ultimate in skin health and sun protection. Forget the burden of using multiple products - Ochre Sun is packed full of multi-tasking ingredients powered by native botanicals. We have revolutionised skin protection specifically to combat harsh Australian conditions. Our sun protection products are designed to improve and protect the skin of those who're building Australia - from stadiums to sand castles and everything in between.

FEATURES OF OCHRE SUN

- Unique formula creates a barrier on the skin's surface to absorb the sun's harsh rays, preventing them from penetrating the skin and causing damage.
- Powerful skin-healing botanicals are absorbed by the skin for antioxidant protection.
- Light-weight lotion, sweat resistant and fragrance-free.
- Dries quickly and completely unnoticeable.
- Breathable texture allows skin to breathe and perspire normally.
- Hard workers will appreciate the dry and breathable texture, allowing the skin to perspire normally.
- Highest Industry Standard Protection - SPF50+ Broad Spectrum UVA/UVB

BENEFITS OF USING OCHRE SUN

- Skin protection from harmful skin cancer-causing rays.
- Reduce the sight of wrinkles.
- Increase skin hydration and elasticity.
- Improve overall skin texture.
- Reverse the effects of free radicals.
- Cleanse the skin of harmful bacteria.
- Protect against harsh weather and UV damage.

RUBS IN CLEAR, NO RESIDUE

OCHRESUN

OCHRE SUN

OUR UNIQUE FORMULATION

Gukwonderuk

Sneeze Weed (*Centipeda cunninghamii*)

Traditional methods of use from the leaves commonly involve an active ingredient – Flavonoid. Flavonoids are used as an anti-inflammatory, anti-viral, anti-cancer and anti-allergic agents.

We use Sneeze Weed is a used to combat inflammation and damage caused by the sun and free radicals in a powerful cell recovery support mechanism.

Gumbinge

Kakadu Plum (*Terminalia Ferdinandiana*)

Rich in Vitamin C, the Kakadu Plum was eaten as bush tucker by our First Australians, although even then they knew the fruit served better as medicine than as food.

We use Kakadu Plum as a powerful ally in the fight against free radicals, cell damage, skin scarring and redness.

This botanical helps to not break down the activity in each ingredient.

Homosalate, Octocrylene, Octyl Salicylate, Butyl Methoxydibenzoylmethane:

This powerful combination of natural ingredients is formulated to add an effective UVA/UVB absorber and skin defender.

OCHRE SUN'S GOOD HUMAN COMMITMENT

· Ochre Sun has and will always continue to use Indigenous botanicals direct from Traditional Owner suppliers. We also promote an Indigenous Circular economy through employment of Indigenous consultants and contractors.

· Through our sustainable sourcing commitment, we aim to create a 'world best' environmental approach to sun protection. Social Impact Certification: QSEC Member, (Pending) Social Trader.

WHY APPLY OCHRE SUN?

It's simple, really - Ochre Sun is the ultimate multi-tasking skin defender. Our innovative range of high performance sun protection products cover off everything your skin needs in a single multi-tasking product.

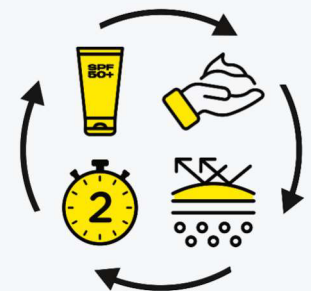

Ochre Sun is a:
